

Testing report (Manual Entry with correct data)

- Expected Result: Products should display without any UI or functional issues.
- Severity: Medium

2) Test Case: TC02

Description:

Disconnect the Grog query and refresh the page to test if the system handles errors gracefully.

- **Expected Result:** The system should display an error message on the screen, such as "Network Error" or "Unable to fetch data."
- **Severity:** Medium
-

3) Test Case: TC03

Description:

Add a product to the cart and navigate to the cart page to verify if the product is displayed correctly.

- **Expected Result:** The product should appear in the cart with accurate details such as name, price, and quantity.
- **Severity:** Medium

Tropical Vibe

\$ 550

Handmade upholstery
Quality timeless classic

Dimensions

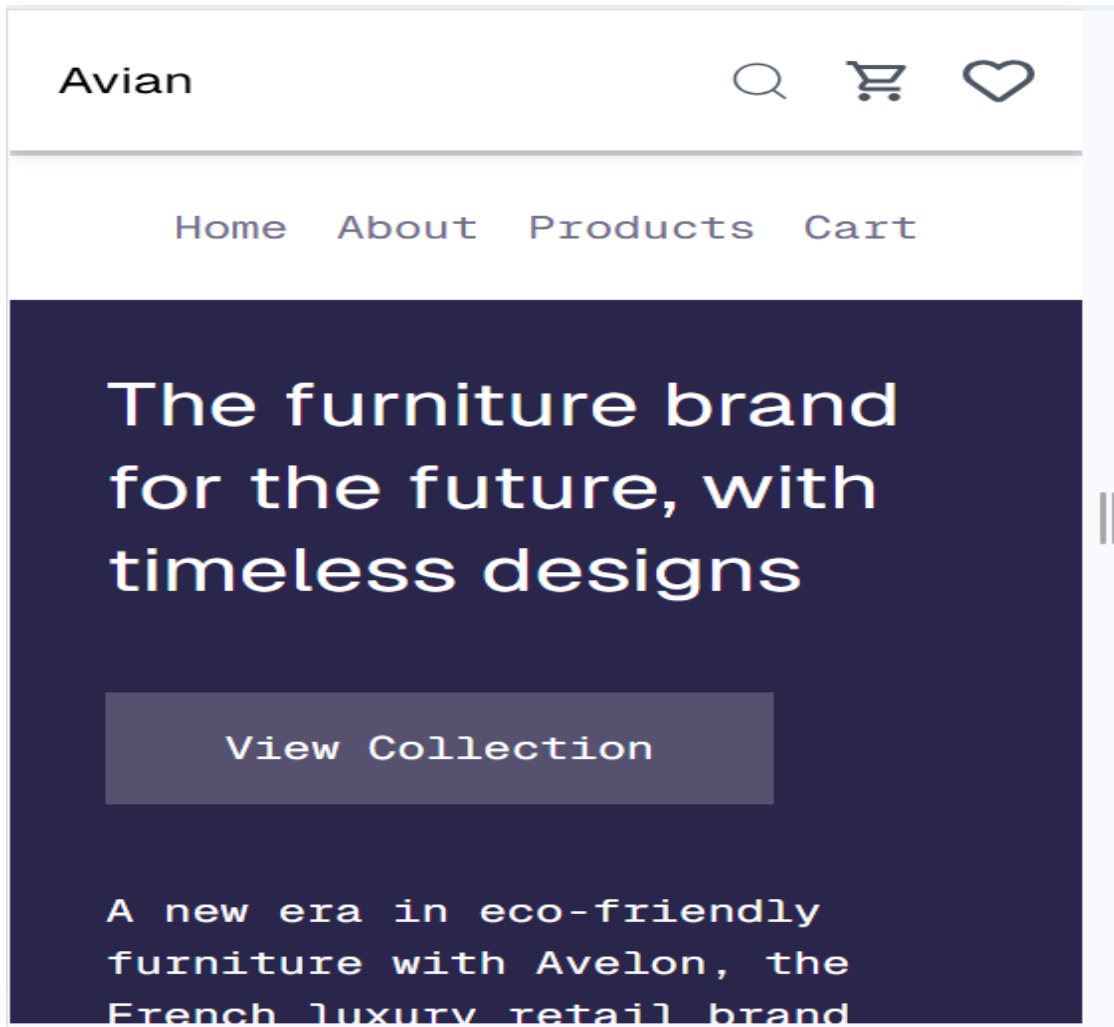

Height	Width	Depth
110cm	75cm	50cm

4) Test Case: TC04

Description:

Inspect the website using developer tools, select the mobile device view, and verify that the content adjusts correctly to fit the device's screen size.

- **Expected Result:** The content should display properly and responsively according to the selected device.
- **Severity:** Medium

5) Test Case: TC05

Description:

Open the login/signup page and test it by entering both valid and invalid credentials. Validate if the system responds appropriately.

- **Expected Result:**
 - For **valid credentials**: Successfully log in or sign up and redirect to the dashboard.
 - For **invalid credentials**: Display an error message like "Invalid username or password."
- **Severity:** High

Dimensions

Height	Width	Depth
110cm	75cm	50cm

7) Test Case: TC07

Description:

Open the website on different browsers such as Yahoo and Chrome to test cross-browser compatibility.

- **Expected Result:** The products should display successfully on all tested browsers without any UI or functional issues.
- **Severity:** Low

Conclusion:

The testing process validated the functionality and compatibility of the website across various scenarios. Key observations include:

1. **Cross-Browser Compatibility:** The website performs consistently across multiple browsers, ensuring a smooth user experience.
2. **Error Handling:** Error messages are displayed appropriately for disconnected queries and invalid credentials, though enhancements can improve clarity.
3. **Responsiveness:** The website adapts well to different device screen sizes, confirming its responsiveness.
4. **Core Functionalities:** Features like adding products to the cart, navigating to product detail pages, and login/signup functionalities work as expected.
5. **Performance:** No significant UI or functional issues were found during testing.

Overall, the system meets the expected requirements with minor areas for improvement in error handling and UI polish. The testing confirms the system's readiness for deployment with medium-to-low severity issues resolved.
